<b>GASTROINTESTINAL HEALTH</b>		
<ul style="list-style-type: none"> <li>• High total digestibility to promote nutrient absorption</li> </ul>	<ul style="list-style-type: none"> <li>• High-quality protein sources</li> <li>• High-quality CHO sources including rice and barley</li> </ul>	<ul style="list-style-type: none"> <li>• High total formula digestibility of 87.8% dry and 80.8% wet</li> <li>• High protein digestibility (87.1% dry and 82.3% wet) and CHO digestibility (94.5% dry and 90.4% wet)</li> </ul>
<ul style="list-style-type: none"> <li>• Formulated to be low in fat</li> </ul>	<ul style="list-style-type: none"> <li>• Meets essential fatty acid requirements</li> </ul>	<ul style="list-style-type: none"> <li>• Total Fat Content:               <ul style="list-style-type: none"> <li>• 6.77% dry and 8.60% wet on dry matter basis</li> <li>• 1.74 g dry and 2.36 g wet per 100 Kcal ME</li> </ul> </li> <li>• Fat digestibility 86.7% dry and 82.9% wet</li> </ul>
<ul style="list-style-type: none"> <li>• Contains prebiotic fibre</li> </ul>	<ul style="list-style-type: none"> <li>• Inulin</li> </ul>	<ul style="list-style-type: none"> <li>• Helps nourish a healthy GI tract</li> </ul>
<b>GENERAL HEALTH</b>		
<ul style="list-style-type: none"> <li>• Formulated to help support a healthy immune system</li> </ul>	<ul style="list-style-type: none"> <li>• Antioxidant vitamins A and E</li> </ul>	<ul style="list-style-type: none"> <li>• Added antioxidant vitamins A and E to help support a healthy immune system including a high level of vitamin E to help reduce oxidative stress</li> </ul>

# CANINE LOW FAT GI CONDITIONS

## INDICATION RELEVANCE

1 out of 3 clients using vet services reported that their dog experienced a GI issue in the past year.<sup>1</sup>

GI problems are one of the most common reasons for clients visiting veterinarians.<sup>2</sup>

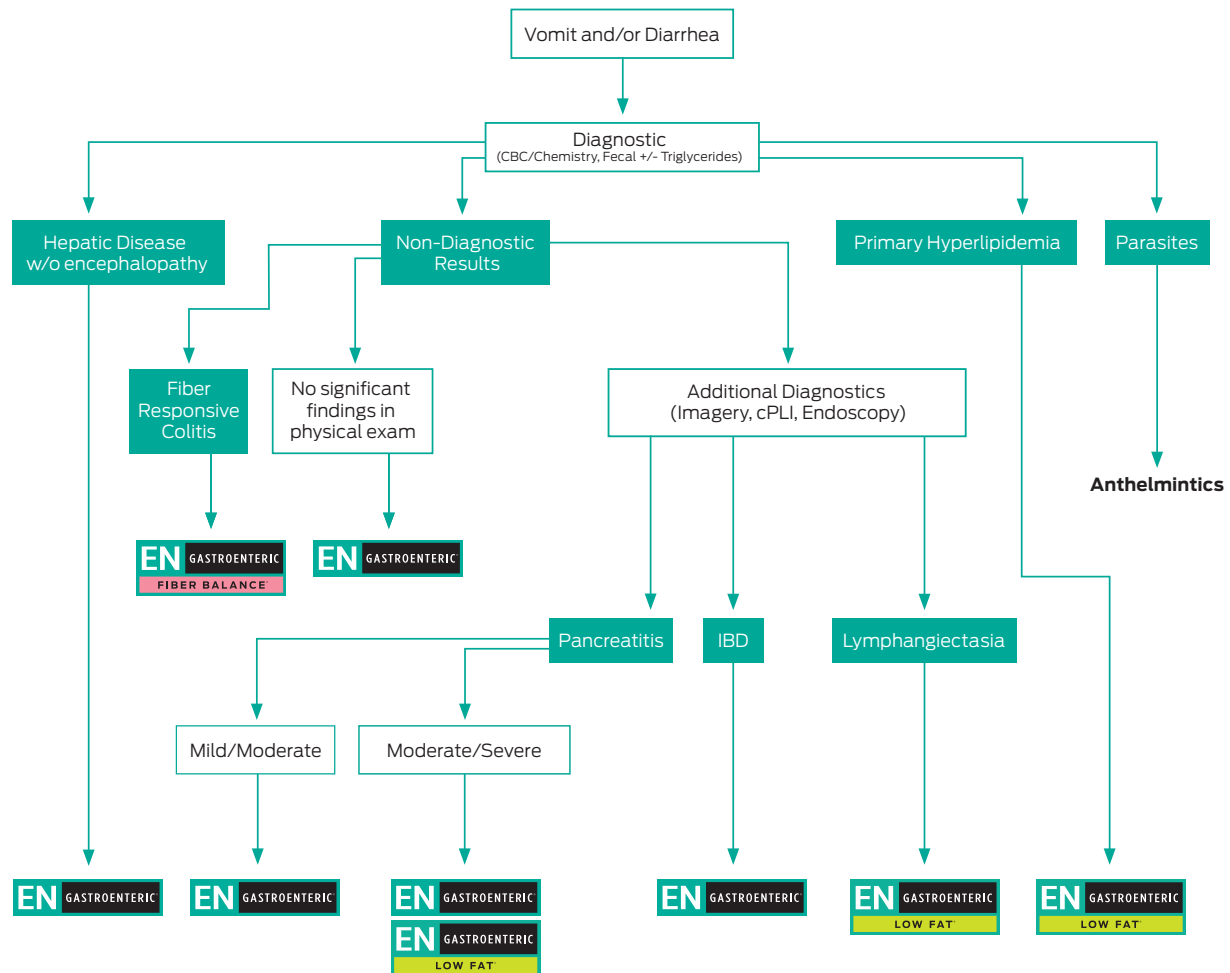

<sup>1</sup>2011 Gastrointestinal Issues Study.  
<sup>2</sup>Kynetec Veterinary Medicine Landscape 2017

## DIETARY MODIFICATION

Some common causes for GI upset are stress, dietary indiscretion and sudden changes in diet.

Dietary modifications can help to nutritionally manage dogs with these conditions by providing a diet with high total digestibility that also helps support gastrointestinal and immune health.
