1 Adjustments must be made for environmental conditions, activity level, body condition and breed size. As reflected in the feeding tables, smaller breed dogs can require $15 \%$ to $25 \%$ more kilocalories per pound of body weight than larger breed dogs. Provide fresh water in a clean container daily.
2 Kilocalories of metabolizable energy (ME)
3 This daily amount should be divided into several small meals throughout the day. 4 For each additional 10 lbs of body weight, feed an additional 114 kilocalories.
